

Chillventa Newsletter 2014

Dear Ladies and Gentlemen,

With the autumn being around the corner, a major trade fair event is just a few weeks away:

The European refrigeration Industry is preparing for the Chillventa 2014!

In our headquarter in Gundelfingen, all preparations are speeding up for the event in Nuremberg!

We will be displaying innovations and proven technology from 14-Oct-2014 until 16-Oct-2014 in Hall 6, booth 316.

I' am looking forward meeting you in Nuremberg:

Nicolaus Krämer

Chief Executive Officer - CEO

Sizing software online:

The online sizing software of HERMETIC Pumps GmbH covers the entire range of the available refrigerant pumps.

Inputs can be made for pump-specific parameters (discharge capacity, discharge pressure) as well as for refrigeration system-specific parameters (refrigeration capacity, circulation factor).

Conversion is performed automatically. After logging in, the user encounters an intuitive user interface, which facilitates convenient designing of the required pump.

One special feature is the design for inverter operation.

Registration at this [link](#).

Chillventa Newsletter 2014

Best centrifugal pump manufacturer in Russia:

HERMETIC Pumps was awarded recognition as Russia's best centrifugal pump manufacturer by the petrochemicals industry.

HERMETIC particularly stood out in the areas of operational reliability, delivery dependability and closeness to customers.

Entry vouchers for the Chillventa 2014 in Nuremberg:

This year also, HERMETIC Pumpen GmbH looks forward to welcoming you at the Chillventa.

Innovations and proven technology will be exhibited from 14-Oct-2014 to 16-Oct-2014 in Hall 6, Booth 316.

You are cordially invited.

Ticket vouchers can be found [here](#).

Certification according to ISO 9001 and ISO 14001:

In the course of regular audits that are carried out according to ISO 9001, HERMETIC Pumpen was also certified according to ISO 14001.

This will not just ensure that the environment will be protected by the leak-free and hermetically sealed pumps from HERMETIC, but also that a sustainable and resource-conserving production system takes the environment into consideration.

**Replacement for the SIHI Novametic 2500 series:
The HERMETIC CAMS series.**

Thanks to its special construction, the CAMS series is able to directly replace the SIHI Novametic series, production of which has been discontinued.

No change in the piping is necessary and the footprint is identical.

**Certification as „Known Dispatcher“ -
From production directly into the aircraft.**

Everyone is familiar with the following situation: Spare parts or entire pumps have to go to the remotest places in the world as quickly as possible.

On the basis of its successful certification as a „Known dispatcher“, HERMETIC Pumpen is in a position to quickly dispatch pumps and spare parts via airfreight.

The required certification was completed:
