New Online-Tool

At this year's CHILLVENTA, we proudly present the new online expert tool for the design of refrigerant pumps.

The new online-tool of HERMETIC Pumps GmbH covers the entire range of the available refrigerant pumps.

Inputs can be made for pump-specific parameters (discharge capacity, discharge pressure) as well as for refrigeration system-specific parameters (refrigeration capacity, circulation factor).

Conversion is performed automatically. After logging in, the user encounters an intuitive user interface, which facilitates convenient designing of the required pump.

Take the opportunity and be inspired by the practical operation of the expert tool.

HERMETIC refrigeration pump type CAMh

The solution for CO₂ applications in the refrigeration industry.
10 pump sizes for CO₂ applications available.

Save the date – special Presentation

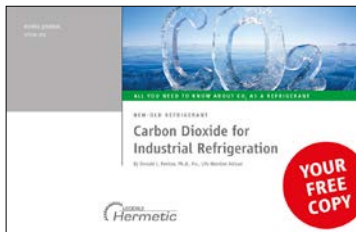

PRESENTATION of Mr. Christoph Galli
Theme: Canned motor pumps in refrigeration plants
Date: 16 October 2018
Time: 15:40 – 16:00
Place: Hall 7A / Booth 7A-618

We look forward to your interest and your visit

Ticket-Service

This year also, HERMETIC-Pumpen GmbH looks forward to welcoming you at the Chillventa. Innovations and proven technology will be exhibited from 16-Oct-2018 to 18-Oct-2018 in Hall 6, Booth 6-116. You are cordially invited. Ticket vouchers can be found [here](#).

All you need to know about CO₂ as a refrigerant

New-Old Refrigerant: The trend with natural refrigerants

In this brochure you will find bundled expert knowledge. Written by experts for experts and users.
